## ➔ What to Expect

In this engaging 1-hour session, we'll dive into the nitty-gritty aspects of quality assurance vs. quality checks. Aimed at anyone involved in the design, development, or testing of digital projects, this workshop will explore strategies for producing quality work at every stage. You'll learn from practical instruction delivered by our experienced facilitators, empowering you to implement an action plan for creating quality projects that will incorporate quality checks throughout the process, building your client's or manager's confidence in your work.

## ➔ Topics Covered

- Quality assurance vs. quality checks
- Common pitfalls during the development process
- Best practices for quality assurance
- Best practices for quality checks
- Checklists for reviews and remediation
